

An indie artist, Abhithi is a product of passion for the arts, perseverance to achieve what the heart and soul desires, and the motivation to make a difference in the world.

Abhithi is multifaceted - singer, songwriter, dancer, actor, model, writer, master of ceremonies, TV show host and radio host. Her creative work aims to empower you to empower yourself.

Having received professional training, her original music brings about a fusion of both Western and South Asian styles, and touches upon multiple genres of singing including rapping. She has released multiple songs both independently and as collaborations. Her original music does not fit into traditional genres; it has a niche of its own. Abhithi takes the term "triple threat" to a different level as she hopes to inspire, educate and motivate audiences as a singer/dancer/actor with meaningful impact. When Abhithi is not empowering through her artistic work, she is making a difference as a practising physician. As a physician, she heals through medical intervention and as an artist, she heals through primary prevention.

Her original song "I" was released in April 2021 as the third song in her EP "Bliss". It got rave reviews. Abhithi wrote, sang and produced the song with the help of award-winning artist TEFO. The jazz-style vocals with Hindustani musical ornamentation on piano pop beats puts you into a relaxing mood as you embody its message - the key to true happiness lies within. Now, get ready for a remix dance version of the original. It will get you in an energetic mood to translate that message into action. This remix was created during the COVID pandemic after a virtual online collaboration with Zha Music in Chennai, India.

Let us offset the depressing restrictive years of the pandemic. Add "I(Zha Music remix)" to your playlist and dance into 2022 with revived hope by believing in yourself.
